

# CAREER EXPLORATION

Career exploration is a critical part of your time at UC Davis. The Animal Science Advising Center, and the Internship and Career Center (ICC) are here to assist as you explore your options.

## WHERE TO START?

Before you can start applying to jobs and internships, examine your interests and explore all of the work opportunities that align with those interests. Career planning is a lifelong process, and it is never too early to start.

## NEXT STEPS

Internships are a great way to gain valuable work experience to be competitive in your career and job search. You can receive internship credit through the Department of Animal Science.

## JOB SEARCH

Once you have clarified your goals for a future career, you can begin preparing for your job search. Start working on your resume and cover letter with the ICC.

## EXPLORE CAREER OPTIONS BY MAJOR

Your major definitely does not dictate your career choice, but can be a helpful starting point. You can also search by occupation interest area. Check out the ICC's What Can I do With my Major or Degree, or Explore by Interest Area pages.

## EXPERIENTIAL LEARNING

There are great internship opportunities in the AEE, ANS, and ANM majors. The ICC has a list of ICC-Supported Internship Listings to explore if you are looking for off-campus opportunities. Check out Handshake to find a broader selection of internship opportunities.

## RESUME & COVER LETTER HELP

Writing a resume is hard work, but the ICC help you! Utilize their helpful templates, and take advantage of document review.
